8/24/68

Dear Fred,

A young correspondent calls to my attention something I hadn't noticed, something I had not heard of anyone else spotting. It is appropriate to the work I asked you to do on Exhibits 153A and B.

If you have a clear print of A around (this is not visible in the printed exhibits) look carefully between the right bicep and the post of the stairs, right against the post. You will find a person there, either a woman or a youth.

What a thing it would be if it blew up to Marina!

But is most certainly is a witness not identified. I know of no effort by the government to have located anyone who may have seen this picture taken, yet there was a witness the FBI and SS should have known was a witness.

Does this help otherwiseo as in sleuthing the two pictures?

Sincerely,

Harold Weisberg
